The broaden-and-build-theory could be defined as a model for explaining the mechanisms behind positive emotions in our minds and bodies, what their effects are, what the evolutionary reason is behind them and why studying them is so important for our well-being.. Studying emotions has always been a challenge. There are different points of view as to what is considered an emotion.

Game theory is the study of mathematical models of strategic interaction between rational decision-makers. It has applications in all fields of social science, as well as in logic and computer science.Originally, it addressed zero-sum games, in which one person's gains result in losses for the other participants.Today, game theory applies to a wide range of behavioral relations, and is now an ...

The first three pieces of Gurlitt's opus 140 make a perfect set. Like a sonatina, the order of movements is fast, slow, fast with a rhythmic fanfare for the first movement--the March--a contemplative second movement--"Morning Song"--and a playful last movement--literally from the German, "Cheerful Sky", but usually translated "Bright is the Sky".
