evaluation for failure outlined and defined); (d) data available on success/failure of root canal therapy in relationship to the obturation/ instrumentation length; and (e ...

Determining the Optimal Obturation Length: A Meta-Analysis

Abstract: The management of chronic suppurative otitis media had witnessed a profound change over the last 100 years. Most ear reconstruction can be done after successful removal of the disease. However, the main primary aim of any surgical procedure is the complete removal of bone destroying disease.
