Although primarily aimed at software architects and developers, the C4 model provides a way for software development teams to efficiently and effectively communicate their software architecture, at different levels of detail, telling different stories to different types of audience, when doing up front design or retrospectively documenting an existing codebase.

The C4 model for software architecture

A programmer, developer, dev, coder, or software engineer is a person who creates computer software. The term computer programmer can refer to a specialist in one area of computers or to a generalist who writes code for many kinds of software. One who practices or professes a formal approach to programming may also be known as a programmer analyst. A programmer's primary computer language ...

Software Engineering is a complex task without the right tools. Enterprise Architect's software engineering capabilities removes the complexity with designing software. Complete with UML, change management, code generation, project management, testing and more, this software modeling tool is a must have for any software development project.

Modeling Tools for Software Development and Engineering

Software documentation is written text or illustration that accompanies computer software or is embedded in the source code. It either explains how it operates or how to use it, and may mean different things to people in different roles. Documentation is an important part of software engineering. Types of documentation include:
